

## **BHC Scientific Meeting**

**Saturday 29<sup>th</sup> October 2016**

**Auditorium 5; Faculteit Geneeskunde UZ Brussel**

**Laarbeeklaan 103, 1090 Brussels**

**9h00-9h15: Welcome coffee**

**9h15-11h00: Session 1**

**Moderators: Tine De Backer (UGent) and Alexandre Persu (UCL)**

9h15-9h30:

Wen-Yi Yang et al. (KU Leuven). Left ventricular structure and function in relation to environmental exposure to lead and cadmium.

9h30-9h45:

P. Vanderweckene et al. (ULg). How to measure accurately blood pressure in hemodialysis patients?

9h45-10h00:

Zhen-Yu Zhang et al. (KU Leuven). Diastolic left ventricular function in relation to urinary and serum collagen biomarkers in a general population.

10h00-10h15:

Marc Leeman and J.R. Thomas (ULB). Use of antihypertensive drug combinations by general practitioners in Belgium.

10h15-10h30:

Anke Raaijmakers et al. (KU Leuven). Extremely low birth weight predisposes to low-renin hypertension.

10h30-11h:

**Jan A. Staessen (KU Leuven)**

**Retinal arteriolar narrowing or hypertension - what comes first?**

**11h00-11h30: Coffee break**

**11h30-13h00: Session 2**

**Moderators: Danny Schoors (VUB) and Jean-Marie Krzesinski (ULg)**

11h30-11h45:

Marie De Groote et al. (UGent). Fibromuscular Dysplasia: results of a multicenter study in Flanders.

11h45-12h00:

Lucie Evenepoel et al. (UCL/ULg). Screening for somatic mutations in a Belgian multicentric cohort of patients with Pheochromocytoma-Paraganglioma.

12h00-12h15:

Sarah Deruyter et al. (UGent). The relation between glycaemic variability and ambulatory blood pressure monitoring in type 1 Diabetes Mellitus.

12h15-12h30:

Géraldine Petit et al. (UCL). Twenty-four hour ambulatory blood pressure level is correlated with psychological profile in patients with apparently treatment-resistant hypertension: a pilot study.

12h30-13h00:

**Philippe Kestelyn (UGent), on behalf of the Belgian Glaucoma Society**

**Glaucoma and vascular risk factors, what is the evidence?**
